COVID-19 & Gun Violence Reduction Work

In 2021, COVID-19 continued to challenge our work. Our street outreach & fellow engagement was limited by the shut-downs of school programs, community centers, other non-profits and service providers. We also witnessed an increase in social isolation, depression, anxiety, fear & uncertainty in our communities brought on by COVID-19 policies. Our work demands everyday face-to-face engagement and pandemic policies adversely impacted our ability to fully support our fellows. In spite of these challenges, our city experienced a decrease in firearm homicides in 2021 compared to 2020. We believe that our continued presence in the community contributed to these declines.
Advance Peace Stockton 2021
